**ADUSA'S DELI KIOSK INTEGRATED WITH TOP KITCHEN DISPLAY SYSTEM**

*Kitchen Video instead of standard receipt printers can communicate orders to the deli.*

**Lombard, Ill.** (June 17, 2008) – ADUSA, Inc. today announced that it had interfaced its deli self-order kiosk system to the ePic® Kitchen Display Software (ePic KDS) from QSR Automations®. The new interface gives retailers using ADUSA's deli kiosks another option as far as how kiosk orders are sent to the deli for processing.

"Many of our clients currently use receipt printers, with an integrated alarm mechanism, to receive and process orders from our kiosks in the deli. This integration with QSR's ePic KDS gives them another option if they want to go a little more high-tech and put in kitchen video monitors. QSR Automations is a leading vendor in the kitchen software and hardware management technology space, so we're pleased to have our application integrated with their system." said Juan C. Perez, president of ADUSA, Inc.
