**ADUSA OFFERS WEB-BASED DELI KIOSK SALES AND HEALTH-CHECK MONITORING**

*Clients can now log on to a secure portal and see how deli kiosks are performing*

**Lombard, Ill.** (August 25, 2008) – ADUSA, Inc. has launched a subscription-based web portal where its clients can go to see how their deli kiosks are performing. “The Deli Kiosk Portal will serve two purposes: One, it will tally sales on each and every deli kiosk for a given time period. Two, it will show the results of regularly scheduled health-checks that we can perform on the kiosks to make sure they are fully operational and available for customers to use,” said Juan C. Perez, president of ADUSA, Inc.

Supermarkets using ADUSA’s deli kiosks can sign up for one, or both, of the services. The sales tracking service will show how each kiosk is performing from a total sales standpoint, while the health-check monitoring service will alert a defined point of contact within the client organization if a kiosk is not functioning properly. ADUSA clients will access both services through a password-protected portal containing only their organization’s information.

Added Perez, “We recognize that our clients need to, first and foremost, focus on their core business, which is merchandising and selling groceries. We also see that IT organizations at many of our client companies are really strapped for time. Put those two together and, while these are tasks that can be performed in our system by our clients, on their own, it made sense to us to try to take the effort off their hands. Ultimately, this type of proactive approach is something that helps make the deli kiosks successful, so it’s in both of our best interests.”
